Summary

Shield and tape-presser for a tape gun

[Hobby & Makers](#) > [Mechanical Parts](#)

Tags: [part](#) [replacement](#) [shield](#) [gun](#) [tape](#)

Replacement shield for our no-name tape gun but should fit a multitude of tape guns. Held in by the tabs on the corners, no screws required.

Recommended print settings:

- PETG, nothing else is flexible enough. TPU might work, but likely isn't strong enough to provide the resistance needed.
- 0.16mm layer height. Due to the taper of the shield, smaller is better here
- 3-5 perimeters
- 100% infill
- 4-6 top/bottom layers
