Summary

It's a rack... for lens caps! I also use it to hold my macro tubes.

[Hobby & Makers](#) > [Organizers](#)

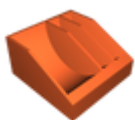

It's a rack... for lens caps! I also use it to hold my macro tubes. Tested on my Sony E-mount Lens Caps.

The OpenSCAD file is parametric. The diameter and thickness of each item can be set using an array.

```
// List the thickness and diameter of each item in sequence THICKNESS =  
[32, 12, 12]; DIA = [62, 61, 61]; // Set the total y and z-axis depth of the  
entire thing. DEPTH = 62;
```

Let me know if you've built it! Tag me on Instagram [@benjiaomodular](#).
