Summary

A stronger, more secure mount for Streamlight weapon light button panels!

A better button panel mount for Streamlight Button Panels! The ones that come with the weapon light are garbage, so I made a rock solid mounting solution!

Mine doesn't have ANY wobble or movement. It feels great!

I use a Streamlight ProTac HL-X. I'm pretty sure Streamlight uses the same button panel across their other modules, however.

You'll Need These To Mount!
