I finally got tired of the silly gap left under nearly any third party antenna or adapter on the FT-60 (which isn't flat, so can't be filled with a simple washer) and made a spacer to go on it =] It may fit a FT-50 as well, not certain.

### Print Settings

#### Resolution:

0.2mm

#### Notes:

I used PETG, but I imagine pretty much anything -- anything at all -- should work. Might be best in flexible filament, we'll have to play with that later.
