Some at my gym prefer skinny handles (I'm not one) so I ran up a design which uses skinny handles =] Uses the same parts and requirements as the original that this is remixed from (<https://www.thingiverse.com/thing:3183887>)

For those with multi material / color options I've included both our gym logo and whatever names I've done models for -- I think it's fun to put the name of the owner on one handle and the gym logo on the other. The name or logo go on the bottom piece, just combine the STL files into a single multi-color model with the bottom and the three logo pieces (crossfit, lehi, and phi) or with a name.

F360 source files can be downloaded from <https://a360.co/2PnrL8j>

Update Nov 10, 2018: Updated the files to support using a clevis pin for the rope anchor
