Mounting for 10lb or 4.5" diameter fire extinguishers.

The extinguisher snaps into the top clip and rests on the base.

Print Settings

Supports:

No

Notes:

Print the bottom fairly solid near the wall as that is what is doing most of the work. I think i used 30 to 40% triangle infill.

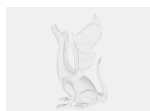

The top clip part should be printed with enough perimeters to be solid on the clips. The infill can be 10 to 15%

I printed both parts with .8mm lines and .32 layers to get it done reasonably fast. I did this with a .4 nozzle.

I printed some with petg and pla. I liked pla better for the top part as the extinguisher snapped in place more securely, but petg is fine. It isn't going anywhere on its own either way.
