Tags: [holder](#) [pet](#) [backup](#) [bottle](#) [bottlecap](#) [bottleholder](#) [bottles](#) [petbottle](#) [petbottlecap](#) [waterbottle](#) [petbottleholder](#) [bottlebackup](#) [slovak](#) [slovakia](#) [slovakrepublic](#)

In 2022 PET bottles (and soda cans) back-up programme was started in Slovakia, so I decided to make myself some "special" holder for transporting empty bottles back to the shop where I can return them.

Holder was designed to be able to fit biggest bottles I could find (Pepsi 2.5l) with lock-in feature to hold them in-place while transport. Design should be able to fit most of printer beds (**170x160x6mm**).
