Do you keep looking for your wallet too? That's why I designed a slim **wallet for credit cards and cash**, to which you can easily attach an **Apple AirTag**.

Just slide the AirTag into the corresponding opening until it snaps into place, and you can locate your wallet at any time.

The wallet comes in **two sizes**: a small version for 5 credit cards and a large version for up to **10 cards**.

Thanks to the compact design, the wallet remains slim and thus fits in almost any pocket.

*** **Update 17/8/2022** ***

I made the clip a little stronger. I also optimized the slot for the bills and rounded it off so that the bills don't get stuck.

Optional coin tray

If you also need some space for coins in the wallet, you can additionally print the **optional coin tray** and simply **slide it into the credit card slot**. Please note that the coin pocket requires space for 3 credit cards and the wallet can hold fewer cards accordingly.

Print instructions

- Filament: Prusament PETG
- Nozzle: 0.4 mm
- Layer Height: 0.2 mm
- Infill: 15%
- Supports: no

I recommend printing in **PETG**, otherwise clip mechanisms for the credit cards and AirTag could break off.

If you print the wallet in an **upright** position, **no supports** are needed.

The coin tray is printed in a flat position.

Let me know if you have any issues with tolerances or the clip mechanisms.
