Apparently the “Minecraft Dungeons Arcade Game” gives out trading cards at the end of each play. My son ended up with a bunch of them and wanted a safe place to keep them. He requested a Minecraft themed crate for storage so I created this.

I used a textured buildplate for the panels which gives it a great look. The hinge has a 2mm hole through it so filament works great.

The crate lid needs supports for the recessed portion, but not the hinge.

There are also 3x3mm holes in the base and lid for magnets to help keep the lid stay closed.
