Summary

My design of the gravity lift! Enjoy!

[lift](#) [prop](#) [video](#) [ability](#)

My design of Horizon's gravity lift! The size is game-accurate, and the details are accurate-ish. (It's missing things like screw holes and such, just really tiny things) prints with a minimal amount of supports.

print settings:

0.2-0.3 mm layer height

2 walls / shells / perimeters

20% infill

And for support, I used tree supports set to "touching build plate"

Raft: Yes
