This is a base to attach a mason jar-type container to a salvaged hard drive magnet so you can stick the spice jar right on your fridge or any metallic surface. I made the space for the magnet big enough to accommodate my biggest magnet, but you may want to test it first to make sure your magnet will fit. Also please make sure the magnet will be strong enough to hold the spice jar to the metallic surface.

You will have to attach the base and magnet to the jar using adhesive, I recommend some good epoxy.

The jars I used are 77.5mm in diameter, if you're using a different diameter please scale accordingly. I used these jars but others will probably work: <https://www.amazon.com/Airtight-Encheng-Storage-Containers-Canisters/dp/B07V4PTLBS/>

I used MatterHackers TPU with a layer height of 0.2 and infill 10%
