This is a remix of Motogeepie's wonderful fan duct, I only combined the two parts to one.

Thingiverse servers have reached the end of thingiverse and won't let me tag the original thing, so here's the link: <https://www.thingiverse.com/thing:3927320>

A few people demanded a combined version and Motogeepie got an error when trying to combine them. I imported the stp to Fusion, remeshed and combined the two to one piece.
