## Summary

Stand / base for an oscillating tower fan. This is for a Honeywell brand, but the bolt pattern seems to be common...

[Household](#) > [Other House Equipment](#)

2mm walls with 7% grid infill were adequate to print this.  
I used 3x 30mm M5 socket head bolts, but the hardware required may vary depending on manufacturer/model: I've seen other models with the same bolt pattern use wood screws.  
The base thickness that the bolt passes through is 17mm. When assembled, the fan retains the ability to oscillate.
