Second interpretation of the realistic Snow Clone / Flame Clone Trooper helmet in 1:12 , 1:6 and 1:1 scale for custom Star Wars figures and props. This one is designed with the filters/speaker things positioned closer together and has an attached central mouthpiece. This version looks less like the animated helmet in the show but I feel it is a better looking realistic interpretation and shares a similar look to the AT-DP driver helmet.

The 1st version/interpretation previously uploaded, please check my page to see.
