Summary

Cover for switch, so you don't accidentally turn your printer off

Tags: [base](#) [cover](#) [mini](#) [prusa](#) [switch](#)

It happened a few times, where I was not paying attention and accidentally bumped into ON/OFF switch and killed my print. So I decided to make a cover, so it is a little harder to switch it without intention. Cover fits tight on switch, but I added double-sided tape just to be sure. I printed it with 0,6 nozzle but it doesn't matter, which layer height you use.
