Introduction

The letters and logo are separated from the body. Click on this youtube [link](#) and skip to 7:28 for in-depth instructions.

Prusaslicer settings

When you load the file, you will get a message to import it as 1 object or multiple. choose no. Because you want to use 2 colors or even more colors.

- layer height: 0.2mm
- parameters: You can experiment with it and choose what looks best.

For a cleaner look, be sure to level your print bed with more squish in your first layer.
