Filly 3D Printed Tobacco Roller

Length is 72mm for the standard size of a rolling paper

The Plastic Sheet/Fabric inside the roller is TPU and is designed with tabs to pop it inside the roller and be replaceable

The Sheet is 0.1mm thick so to print it and have strength it was printed at a .05mm layer height (1st layer included) so its 2 passes and was printed on an Ender 3 S1

The Body and rollers were printed in PLA
