[sunvisor](#) [visor](#)

This sunshade is designed to help you see the screen of your iPhone 11 Pro even in strong sunlight. It also delays the heating of the iPhone in high air temperatures, which normally causes an automatic reduction of the screen brightness.

Simply place the iPhone 11 including the case in the sun visor and you're good to go.

The sun visor has openings for the Lightning connector to charge the iPhone even while in use, as well as for all side controls.
