A simple Lithophane lamp. This is provided just as an idea. The actual size of the lamp shade and socket will make it difficult to repeat.

The design was complete using Design Spark Mechanical while the lithophane was completed using the online tool <http://3dp.rocks/>. The original picture was a photo I took of a painting completed for me of my dad's boat and wharf not long before fell apart.

The hardware required is simply the working parts from a lamp. I bought the lamp cord, switch, and plug at a local hardware store.
