Just what it says - a wall bracket for a Phillips 7000 shaver.

The shaver clicks into the hanger firmly and securely. Might even be earthquake proof.

Needs 2 screws - 4 x 25mm countersunk. The part for the screws sits UNDER the hanger so the arms kind of point upwards.

I printed this with white PETG so the arms are slightly pliable (springy). PLA might be a bit brittle.

Regards, Paul
