Summary

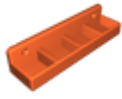

Made to display the nail polish that did not get fancy collection boxes.

Made to keep my partners nail polish on display as she tends to enjoy things more when she can see them. Will hold any polish bottles that are 30mm by 30mm square. Mounts via screw. If you need a different dimension hole for the mounts feel free to reach out and I will add an edit with your mounting hardware dimensions. First model I made with fusion 360 and I think it turned out well. Made to fit multiple copies on a Prusa Mini Bed.
