updated 14. 8. 2022 | published 14. 8. 2022

Summary

yet another centerpiec of a rubiks kube

[Toys & Games](#) > [Puzzles & Brain-teasers](#)

since i tried the first version of the cube and the center piece was crab and all side cubes broke off... i decided to try v2
i saw the screws an thought why not screw all 4 center pieces
print is in progress...

edit:

at least on my printer the screws screwed up and i endet drilling a 5mm hole in the top-screw to press fit.
maybe its to sloppy so that sometimes the middle blocks slip out of the cube

This remix is based on

Rubik's Cube V2 (speed cube) (100% 3D printed)
