Tags: [helmet](#) [horns](#) [human](#) [skull](#) [viking](#)

This is a detailed model of a human skull sporting a Viking helmet ( yes I know they didn't really wear helmets like this ). Just a bit of fun really.

The helmet was designed by myself on Shapr3D and the skull I designed on Nomad and is available as a separate model on Printables.

I have also included the file for helmet on its own should you wish to use it for something else.

I have blocked out the model under the helmet to aid printing, washing and curing.

if printing in resin it is best tipped backwards by 20-30 degrees and will need supports.

Check out my YouTube Channel ( Jimson's Stuff) where I make all sorts of things and also review tech including 3D printers.
