Tags: controller dualsense headset headsetholder playstation playstation5

Stand for two Dualsense 5 controllers and a headset. Features a passthorugh for a charging cable that will connect to either controller or the headset. Designed for Dualsense 5 and the Pulse 3D headset, but should work with most headsets.

I have uploaded a larger and a smaller version. The larger one should accomodate most standard charging cables, but takes up more desk space. The smaller one has shorter "feet", but will still allow for charging if you have an angled charging cable. There are also seperate files for having the cable channel going to the right og left side of the stand.

For each stand you will need:
1 Top part
1 Middle part
1 Bottom part
2 Feet
(Pick the bottom part that fits your needs)

The parts should fit snuggly together, but I do recommend adding some glue for extra stability.

Hope you enjoy!
