Awesome Skull Bowl for Halloween candy/decoration.

I would love to see your makes! Post them below.

This is easily one of the coolest 3D prints I've done. It was designed for no supports, but I would use supports of at least 75+ degree overhangs, otherwise the underside might not turn out. It took my Anycubic Vyper 19hr 10min to print so be prepared for a long one. Well worth it though. Happy Printing.

The original design by JSchulze on Thingiverse, link [here](#).
