Summary

Flexible Keychain with the side profile of a dog

Tags: [articulated](#) [dog](#) [flexible](#) [flexy](#) [keychain](#)

I wanted to make a flexible keychain with the profile of a dog, used an image from google and modeled the hinges in somewhat random places. Comment if you want an updated model with looser tolerances. It deflects a full inch or so along the whole body at full bend and it's not so loose that it makes a lot of noise when it bounces around, in its current design.
