Summary

A two tiered display shelf

Hobby & Makers > Organizers

Tags: display displaystand shelf

I needed a way to display some of my prints, and I wanted it easily portable. So, I designed a two tiered display shelf that can easily be broken down and reassembled without the need for tools or hardware.

To make one unit, you'll need to print at least two shelves and two supports. If you need more stability, you can print up to two braces. Each brace needs two pins to hold them in place.
