Summary

Total remake of one of my oldest kits!

The classic and favoured fighter-bomber starfighter to be used by the Rebel Fleet against the Galactic Empire, the **Y-Wing** is a sturdy work-horse that has been used in countless conflicts for across the galaxy.

This is a total reworking of one of my very oldest kits which has been showing its age for some time now. Featuring surface details, fully-ish 3D nacelles, and a more true-to-form silhouette!

Original Y-Wing Kit:

<https://www.printables.com/model/143146-y-wing-kit-card>

X-Wing Kit:

<https://www.printables.com/model/143177-x-wing-kit-card-redux>

B-Wing Kit:

<https://www.printables.com/model/143174-b-wing-kit-card>

Included is the standard fit, same as past kits, but also a tighter (**labelled Ti**) variant as I know some of you might find them too loose!

For those uninterested in the card format, there are frameless variants included, alongside the individual part files!

Be sure to line the nacelle parts up correctly using the arrow guides!

If printing individual parts, be sure to include 2x **Nacelle_A**, 2x **Nacelle_B**, and 2x **Nacelle_Cap**!

Print at **0.2mm layer height**, there really is no benefit from printing at a higher resolution and it could affect the fit.

The model parts are 1.8mm high, which is not divisible by 0.16 for example!

Be sure to print with **100% infill** for it to hang straight as the weight distribution can be sensitive!

Makes greatly appreciated, always glad to see them! Happy Printing!

Interested in selling?

All files are marked as non-commercial along with any remixes created from them.

If you are interested in selling physical prints of my models anywhere, be it online or offline, you can obtain a **sales license** when subscribed to Tier 3 of my **Ko-Fi memberships**!
