Summary

Cooling stand for DJI Mini 3 Pro for updating firmware and transferring data

[Hobby & Makers](#) > [RC & Robotics](#)

Tags: [drone](#) [mini](#) [stand](#) [dji](#) [djimini3pro](#)

Designed and 3D printed a stand for my Mini 3 that has a small 40mm USB fan on it to keep it cool while transferring data and updating firmware. Works real well. It also all unclips apart so it can be put inside most carry bags.

Used Fusion360 to do the design. Fan is just a 4010 5V USB fan off [Amazon](#).
