Unfortunately the right frame of my beloved Urbanears Plattan Adv Wireless broke and UE wouldn't send me a spare one, so I designed one myself.

Works like a charm ♥

Print instructions

Sand it down a bit and make sure it fits snugly into hinge part of the headphones.

To improve fit, the part needs to be deformed into its original form. For this, hold the size adjustment section into the steam of an electric kettle to soften the plastic. Then form it in to a roundish form, using the original part as a mold. This is important to improve fitting and overall wearability!
