Oozey the slime, modelled by [Mophs](#) and shared under CC-BY on [OpenGameArt.org](#). The model is originally based on a [public domain sketch](#) by [surt](#).

I've updated the model and increased the polygon count so that the facets aren't visible in a final print, no matter what the resolution. I've fabricated an example with clear resin on a Form 3 SLA printer. It would make for a good game piece or RPG token.
