### Summary

A storage for CDs and DVDs

[Household](#) > [Office](#)

This is a storage for CDs and DVDs.

I wanted to store my CD-R and DVD-R discs in one place so I designed one.

I also made a separator so I easily can see where the other kind of disc starts...

(see picture)

When I printed the lid I first selected the lid body in the slicer and deleted it, and only printed the letters in one layer. (0,4 mm)

I then clicked undo in the slicer to bring the lid back, deleted the letters, changed filament, and printed the lid with the same first layer height of 0,4 mm.

I printed this in rainbow PLA and the text in white PLA
