**This is another model from my [Vapor's World collection](#).**

Protection for Geekvape Zeus Subohm Tank.

If the mod accidentally tips over, there is a high risk that the glass tank will break. This protection prevents that.

No support required.

**Note:** Apparently there are two different Geekvape Zeus Subohm tanks with minimally different dimensions. If this model is too small for your tank, you can scale it to 105% in the slicer.

**I am looking forward to your Makes! :-)**

If you like this model, feel free to check out my others [here](#).
