A tiny add-on for your typical soap dispenser: clip this tiny guy on and forget paying attention to not pump too much soap into your hands.

Fits soap dispensers with a diameter of approx. 6mm. To adjust pumped volume simply stretch in z direction in your slicer. In my case it is around 9mm high for a full pump length of 12mm, meaning it leaves 3mm to pump and it still is more than enough soap to wash your hands.
