### Summary

Needle file box for Craftsman Needle File set and a 3D printed handle.

[Hobby & Makers](#) > [Tools](#)

Tags: [needlefiles](#)

I wanted to keep a 3d printed handle for my needle files and a set of Craftsman needle files together. Files are a tight fit and you need to press pretty hard the first couple of times to get them in, but figure over time this will loosen up.

Lid slides into a notch on three sides. The file handle that fits in the box is Pizza\_Cat's design <https://www.printables.com/model/245651-needle-file-handle/files>

Printed in PETG without supports. Print the top lettering down as there is a tab on one side to keep the top closed.
