Summary

Simple storage box for all those extra/duplicate Allen Wrenches you get with items requiring assembly.

I wanted to collect all those loose Allen Wrenches you get with furniture, shelving, cabinets, etc. So many are duplicates that organizing them by size just wasn't worth the effort, so I made a box to at least put them together in one place.

Used PETG for the box. Print the lid lettering side down as this is a knob on the bottom that helps keep the top closed. The lid just slides into the groves on each side.

UPDATE: As requested, added separate top and bottom files.
