Tags: [steamdeck](#) [steamdeckstand](#)

This is a vertical stand for the Valve Steam Deck for use with games that utilize a vertical play field such as shooters and pinball games. This features carefully placed supports as to not block the fans or ports. It is recommended to add some rubber, foam, or cork padding in the bottom just to make sure the steam deck doesn't experience wear. This is intended for use with an external controller. This model requires no supports when printed in the upright orientation. Design by @candicemakes.
