---

This is a remix of the EVA 3 40mm Part Cooling Fan Inlet.  
This inlet fits 38 mm fans that have 30 mm space between mounting holes.

my 40mm fan didn't give me enough cooling and I happened to have a bunch of 38mm server colling fans that have a 10W rating so I remixed the original colling duct to fit those fans.

This Inlet has the exact same mounting holes for the EVA core so it's basically an instant replacement.
