I found this model at [MyMiniFactory](#) and modified it for easier printing. I also added a stand and made a fuse out of wire and a key ring.

For better details, use the variable height layer on the Impact Grenade button part as you can see in the picture.

You will also need a pen spring. [Here](#) is more information about this gaming gadget.

Printer: Ender 5pro

Rafts: No

Supports: No

Resolution: 0.2 mm

Infill: 15 %
