Tags: [camera](#) [gopro](#) [lens](#) [mount](#) [cover](#) [pro](#) [fpv](#)  
[actioncam](#) [runcam](#) [thumb](#)

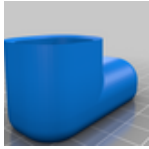

This is a remix of the [ThumP: A Runcam Thumb Pro Mount \(open source\)](#) whose original author is [@Timeless3D](#).

It is based on the V2 Jello Wrangler variant with the following modifications:

- Reduced the length of the lens shroud which allows you to change ND filters without removing the mount from the camera.
- Added a lens cover to protect the mounted lens cover/ND filter during transport.

Print with TPU, no supports and 20% infill.
