## Summary

Six conjoined carved pumpkins, as a Halloween decoration! My entry for E3D's 2021 Halloween competition.

### About the model

I decided to release PumpKIN: my entry for E3D's carved pumpkin competition back in 2021. (I don't think they ever announced a winner, but it couldn't have been this.)

Instead of using the provided pumpkin model, I created my own - which admittedly looks more like a dumpling than a pumpkin! - and joined six of them together, before carving faces out of them.

Purely as an accident, I found that scaled versions of this model stack nicely on top of each other. Pictured are versions at 100% (green), 40% (orange) and 10% (yellow).
