Summary

Vase to be printed in vase mode or spiralized outer contour

[Household](#) > [Home Decor](#)

Tags: [heart](#) [vase](#) [vasemode](#)

Vase designed for vase mode or spiralized outer contour. Scale to your need; however, keep an eye on the inside during your slicer preview to make sure it's clean.

I have used 0.4mm and 0.6mm line width (even with a 0.4 nozzle). May be even possible to do a 0.8mm line width.

0.3 layer height is what is in the picture. Should work with lower layer height as well

Used a marker to color the hearts :)

Hope you enjoy!
