### Summary

Wheel designed for a 1/10th rc car.

[Hobby & Makers](#) > [RC & Robotics](#)

Tags: [tamiya](#) [rccar](#) [radiocontrolcar](#) [tt02](#) [tt01](#)

Designed to fit a standard 26mm tyre. +3mm offset, 12mm hex. Will take up to a 4mm shaft.

This is a multi-piece rim. For best results ensure you have the flow rate calibrated on your printer, especially for printing the red stripes. I designed a small 0.2mm tolerance into the slots, but an uncalibrated flow rate may produce slightly oversized parts that will require sanding to fit.

For personal use only. No commercial sales.
