---

This is a modular LED strip wall mount, it is 10 cm long and the mounts just snap together so you can make it as long as you wish for. The LED strip just slides in no glue required.  
Have fun!

Update 03/19/19

Added a version for LED strip WS2812.

Update:

by request, I made two other versions with mounting screw holes if you don't want to glue it with double-sided tape. one version with holes for M2 flat head Phillips self-tapping wood screws. the second version has a place for M4 flat head Phillips self-tapping wood screws in case you can't find any M2 screws. Hope you like it!
