A small drum I designed as a prop for a pumpkin painting event. Can be used as decoration or a prop. A color changing filament like I used looks great on it! The head can also be customized with different top and bottom infills for cool designs. Includes the drum heads which can be glued on to each side of the drum body. While I haven't done it myself it would technically be possible to scale this up to any size you want, so go crazy! Happy printing :)
