Summary

A fanciful city in the style of MC Escher, set on a mountain-top.

Tags: [city](#) [escher](#) [mountain](#) [town](#)

I designed this to either be printed as one piece or as the empty mountain base with interchangeable 100x100mm cities. Specifically, as I only have a single-material printer, I did a filament swap after layer 20 to change the city to translucent PLA from the base gray color.

To allow for easy insertion of the city plates, print the mountain base at 101%.
