This is a simple stand I designed for my Behringer Q502USB mixer. Making things more accessible when placed on a desk.

It will probably work great for similar ones like the 302 and 802 as well. Might also work with bigger ones like the 1002 and 1202, by scaling it wider in the slicer or using two.

If this helps you out, please like, rate and/or share a picture of the result! Otherwise, please leave a comment with feedback 😊

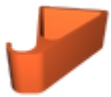

Print instructions

Print on one of its sides

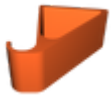

Changelog

11-02-2021 - Modified the design to be sturdier. The pictured, now removed, design was starting to slowly yield (due to **creep**, when printed from PLA)
