The **newer rack design** for the Zuca All Terrain Disc Golf Cart is much improved over previous designs. However, the racks work best when full, and I don't always want to carry 30+ discs when I go out to throw.

I designed these dividers to clip onto the bars and keep your discs in place no matter how many or few you carry. So far they have done a decent job of staying put for me. The spacing for the top and bottom is slightly different, so each divider is labeled accordingly.

I also created a storage box that clicks into place on the bottom rack, but is easily removable to access smaller items. You can use a divider butted up against the box to be extra sure it stays in place. (The provided file does not have the beard logo embossed on the front). V2 of the storage box has better attachment points to keep it from tipping backwards while rolling the cart.

Hopefully others will find these parts useful. I plan to post a few more Zuca accessories soon.

Print Settings

Printer Brand:

Creality

Printer:

Ender 3

Rafts:

No

Supports:

No

Filament: Overture PETG

Notes:

Supports may be needed for overhangs on storage box.
