Summary

A stand for 3 (or 4) BambuLab X1 plates in the gridfinity framework.

[Hobby & Makers](#) > [Organizers](#)

Tags: [gridfinity](#) [bambulabx1](#) [bambulab](#)

Large baseplate holder that is 7 gridfinity cubes wide.

Prints fine diagonally on the X1 with brims to help keep it flat, but it is challenging to line up.

Three versions in one file.

Plates are offset so you can read the name printed on each plate.

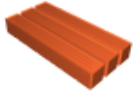

2023.08.11 - Update:

Added a 4 plate version STL... cause I bought another plate.
Also added mirror versions...
