## Summary

Tray to hold your soap or other small things in the shower

[Household](#) > [Bathroom](#)

Tags: [shampoo](#) [shelf](#) [shower](#) [soap](#) [tray](#) [wallmount](#)

A small wall mounted tray to hold your soap in the shower. a modifier is used to get rid of the top and bottom layers in the center so the soap will drain, I liked the honey comb infill pattern. for the finish.

The example is printed from recycled PETbottle filament but you can choose and filament.

Print settings aren't overly important. layer adhesion is though.
